## SECTION B

### 51. Read the passage below and answer in full sentences the questions that follow.

The primary six class wanted to know how timber is obtained from trunks of trees. They were also eager to know how furniture is made. They asked Mr. Elius, their teacher of English if they could visit a sawmill and a carpentry workshop. Their teacher got excited because he could not expect the class to bring such a **brilliant** idea. He assured them that this could be possible after talking to the head teacher about it. After a couple of days Mr. Elius informed the class that their dream had come true. He told them that he had already visited Nsika sawmill and Kajani carpentry workshop. The managers had already granted permission to take his class on a study trip. However, the learners were required to wear gumboots to **protect** themselves from being pricked by sharp objects like nails and sharp wooden pieces. The learner had to contribute five thousand shillings to hire a bus since it was twenty kilometers away from school.

On the next Friday morning, Mr. Elius addressed his class and gave them instructions on how to take note of what they would learn. He told them to ask many questions as possible. At the saw mill, the learners were surprised to see logs of trees being split into big planks with electric saws. These planks were again split into medium size pieces. At the sawmill, they learnt how timber is obtained before making furniture.

After the sawmill, they continued to Kajani carpentry workshop. This is the busiest workshop. It is normally called Kajani busy furniture factory. It employs both men and women.

The learners couldn't believe their eyes when they saw that most of the workers were women. They were busy making planks smooth using planes. A group of Women were busy working on finished furniture using sandpaper to polish. They also used varnish to make it shine.

The few men used glue to fix the joints of chairs, tables, stools, and benches. Thereafter, they used hammers to drive nails in pieces of wood. The learners said it was wonderful to see women using a drill to make holes in the wood, and using a plane to make timber smooth. The class learnt quite a lot and they thanked Mr. Elius for a companying them.
